

1ACC001:

How do I enter opening Accounts Receivables Transactions?

The video shows you how to enter outstanding Invoices, Credit Notes, and Adjustments from the Receivables Ledger in your legacy system to CargoWise One.

This process creates journal entries that allow you to receive payments from your customer, against invoices that are from both your CargoWise One and legacy system. You will also be able to include these transactions in a Statement issued to your debtor. Complete the activities in this workbook to develop fluency in this topic.

important: Before you start entering your opening AR transactions into CargoWise One, ensure all the legacy data is correct, without any errors, and that all transactions have been allocated.

Activity One

Create a Receivables Journal for an outstanding Invoice from your legacy system.

1. Go to **Manage > Receivables > Receivables Transactions**.
2. Click on the **New** button and select **New Journal**.

It is recommended that you create one Journal for each outstanding transaction. You may need to refer to a detailed, aged, outstanding report from your legacy system to complete the required information.

3. In the **New AR Journal** window, enter/confirm:
 - a. **Date:** enter the original Date of your transaction
 - b. **Post Date:** enter the Post Date
the cutoff date for your legacy system can be also be used here.
 - c. **Due Date:** enter the Due Date
 - d. **Account:** enter the debtor's organization code
4. Move down to the **Journal Details** section and enter:
 - a. **Description:** enter the Invoice Number from your legacy system
 - b. **Currency:** enter Currency
 - c. **Journal Amount:** enter the Total Invoice Amount
 - d. **Debit/Credit:** select Debit or Credit

Helpful Hints

Recommended Learning Units

- [1ACC002](#) explains how to enter opening Accounts Payables Transactions

Debtor Organizations:

You must make sure that the debtor organizations from your legacy system exist within CargoWise One, and they have been flagged as Receivables. For information on how to create a Receivables Organization, refer to [1COR051](#).

GL Account Code for AR Clearing Account:

This account is configured via your System Registry, for more information see: [How To – General Ledger, Link and Framework Accounts](#)

Note: Invoices will be entered as Credits, while Credit Notes will be entered as Debits.

- e. **GL Account:** enter the GL Account code for your AR Clearing Account
- f. **Branch:** enter the Branch
- g. **Department:** enter the Department

5. Click on the **Post** button.
6. Repeat this process for all outstanding transactions. If you have a large number of outstanding transactions, refer to [Activity Two](#).

Activity Two

Import the opening Accounts Receivable Transactions sourced from your legacy system into CargoWise One.

1. Go to **Maintain > Account > Import Data**.
2. In the **Accounting Data Conversion** window, click on the **Browse** button.
3. In the **file directory** window, select the legacy transactions CSV file and click on the **Open** button.
4. Returning to the **Accounting Data Conversion** window, beneath the file location field, enter the following:
 - a. **Debtors:** **Select**
 - b. **Post Date:** enter the Post Date
this should be changed to be the last day in the prior period before Go Live
5. Click on the **Start import** button.
6. Once complete review the **Total Amount** figure, to ensure it matches the total amount owed by all debtors on cutoff.
7. In the **Information** system prompt, click on the **OK** button.
8. Click on the **Save** button.
9. In the system prompt, click on the **Yes** button.
10. In the **Save finished** system prompt, click on the **OK** button.

CargoWise One will now create the required journals for you. You will need to ensure that the balance of the created journals matches that of your Trial Balance.

Legacy CSV File Format:

When exporting the transactions from your legacy system, ensure that all current and outstanding transactions for the Receivables Ledger are included. That is, all Receipts and Invoices have been posted. A copy of the CSV file template required for import can be found [here](#). If there are any issues with the CSV file that need to be resolved, you'll receive the following error upon import, detailing the error count:

Details of the error will display in the **Accounting Data Conversion window > Import Output** field.
